## **Town of Nahant WATER DEPARTMENT**

Public Water Supply  
# 3196000

Dear Water Customer:

The consumer confidence report provides important information pertaining to the quality of water supplied by the Town of Nahant in partnership with the Massachusetts Water Resources Authority (MWRA). This annual report provides information on the MWRA's reservoirs and the quality of water as per federal and state regulations.

The Town of Nahant has 26 miles of distribution pipeline serving approximately 1400 service connections. The average daily consumption was 280 thousand gallons per day. With funds provided by the MWRA Local Pipeline Assistance Program along with the Town funding, the Town of Nahant has been replacing or relining water mains. The Town has also been replacing fire hydrants and valves through the distribution system. The Town has also replaced the old water meters with Automatic Remote Readings meters. Other preventive maintenance performed includes town wide water main flushing and leak detection.

Results of routine water sampling and lead and copper testing were well within federal and state guidelines for the year, with a level of 2 ppb for September 2012, below the Action Level of 15 ppb.

The Water and Sewer Department can be reached at 781-581-0026 during regular Town Hall hours. In case of an emergency, contact the Nahant Police Department at 781-581-1212.

Sincerely,  
Timothy Lowe  
Superintendent DPW
