

CITY OF EVERETT

Public Water Supply # 3093000

CITY SERVICES FACILITY WATER/SEWER DEPARTMENT 19 Norman Street Everett, Massachusetts 02149

Dear Water Customer,

The City of Everett, in partnership with the Massachusetts Water Resources Authority (MWRA), would like to present to you the 2014 Annual Water Quality Report.

Water Consumption

The City purchases our water from the MWRA. The average daily flow of water was 3.64 million gallons per day. The single highest daily flow for 2014 was on 7/1/14 in the amount of 4.64 million gallons. The maximum flow week occurred from 7/7/14 until 7/13/14 in the amount of 29.20 million gallons.

Maintenance:

The City of Everett has completed the installation of the new automatic read water meters. We also conducted hydrant flushing in April 2014 to remove sediments in the water mains and to check the physical condition of the hydrants. The City is currently performing water main improvements on Bartlett St., Orient Ave., Hadley Ct. and Dane St.

Water Quality:

The City collects water samples weekly from designated sites throughout the city. These water samples are sent to the MWRA lab for testing. The samples are tested for chlorine residual and coliform bacteria. All test results were normal in 2014. We also collect samples for lead and copper once a year. Lead results were 1.04 ppb which is below the Action Level of 15 ppb. Copper results were 179 ppb which is below the Action Level of 1300 ppb.

Cross Connection Program:

The City also has a cross connection program that is conducted twice a year to prevent contamination to the city's public drinking water.

In December 2014, the City was issued a notice of non-compliance from DEP regarding primary certified operator staffing. The City will be in compliance in 2015.

The City Service Commission meets every second Wednesday of the month at the City Services Facility at 6:00pm. If you have any questions, please call Ernie Lariviere at 617-394-2387 or 617-394-2327.

Ernest Lariviere
Water Superintendent
